

Virada Games Training Guide

This is a training manual for Virada Games software package. This application keeps track of our Products, Customers and Transactions.

Selecting a Product

Select a item from the Product List Box to see information about that product

Adding a Product

There are three different types of products that can be added. These can either be a Game, Platform or an Accessory.

Enter the basic product details into the Item Info Group (Purple)

Enter the corresponding data into the relevant group whether the item is a Game(blue), Platform(Aqua) or Accessory(Green). *Only One is allowed*

Press ADD(Red)

Note Double Clicking on Product ID Text Box will clear all of the Products Text Fields

Fig 2

Note Double Clicking on Customer ID Text Box will clear all of the Customer Text Fields

Selecting a Customer

Select a item from the Customer List Box to see information about that Customer

Adding a Customer

Enter the customers details into Customer Info Group(Yellow).

Press ADD(RED)

#NOTE Not entering in data before pressing ADD will create a new default Customer where the ID will be C000 and the Family Name, First Name and email will be UNKNOWN

Selecting a Transaction

Selecting a Transaction from the listbox will auto select the corresponding product and customer listboxes items in.

The screenshot shows the 'Virada Games' application window. It features several sections: 'Item Info' with fields for Product ID, Description, Stock Quantity, and Retail Price; 'Games' with fields for Publisher and Media Type; 'Platforms' with a Model Number field; and 'Accessories' with a Platform Type field. The 'Products' section has an 'ADD' button and a listbox containing various game titles. The 'Customers' section has a 'Customer Info' sub-section with fields for Customer ID, Family Name, First Name, and Email, and a listbox containing customer names. The 'Transactions' section has a 'Transactions Info' sub-section with fields for Customer ID, Product ID, Quantity, Retail Price, and Date, and a listbox containing transaction records. Arrows indicate that selecting a transaction in the listbox will auto-select the corresponding product and customer.

Fig 3

Creating a Transaction

Select one Product from the Product Listbox(Blue) and a Customer from the Customer Listbox(Orange)

The screenshot shows the 'Transactions' section of the application. It features a 'Transactions Info' sub-section with fields for Customer ID, Product ID, Quantity, Retail Price, and Date. The 'Customer ID' field is set to 'C002', 'Product ID' is set to 'PS4G001', 'Quantity' is set to '1', 'Retail Price' is set to '69', and 'Date' is set to '26/11/2018'. To the right of the 'Transactions Info' sub-section is a listbox containing transaction records. An 'ADD' button is located above the listbox.
